RAILING

# TRANSFORM<sup>®</sup>

## COMPOSITE RAILING

Composicore<sup>®</sup> engineering resists rot, warping and mold for a timeless wood look without the upkeep, plus customizable options to fit any style.

### Easy Install

Universal bracket for level, stair or angled applications.

### Customizable

Can mix and match with Avalon<sup>®</sup> Aluminum Railing for a custom look.

### Clean Design

Hidden brackets provide a clean, finished look.

Composicore<sup>®</sup>

Composicore construction guarantees superior resistance to moisture, rot, warping, splintering, mold and stains.

# TRANSFORM<sup>®</sup>

Timeless style bridges traditional and contemporary looks with composite profiles that resemble finely milled wood. Performance-engineered Compositore<sup>®</sup> construction outlasts wood in beauty, maintenance and safety, with mix-and-match options to personalize any space.

- Lightly textured, protective acrylic cap provides rails with the look of painted wood
- Universal bracket for level, stair or angled applications
- Compatible with Avalon<sup>®</sup> for a custom look
- Concealed brackets provide a clean, finished look
- Superior resistance to moisture, mold, rot and warping
- Multiple infill options—including aluminum baluster and stainless steel cable
- Mounting adapters eliminate individual baluster fastening to speed installation
- Matching gate kits and compatible LED lighting available.
- Designed to meet national residential (IRC) and commercial (IBC) codes\*  
*\*Consult local regulations for specific requirements*
- Transferable Limited Lifetime Warranty
- Proudly made in the USA

# How It Works

## 1 Ease of Installation

Transform level and stair balusters attach quickly and easily with mounting adapters, saving time by eliminating the need for tedious nailing or screwing each baluster into the railing. This innovative baluster adapter works in both level and stair rail configurations.

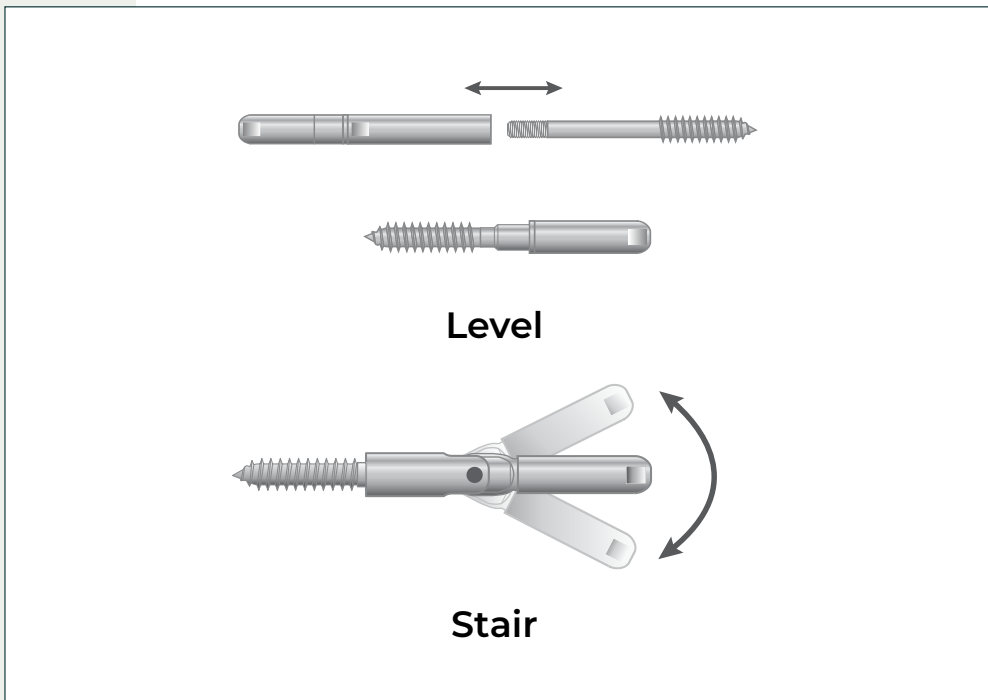

## 2 Unique Bracket Design

Brackets are concealed within the rail structure, providing a clean finished look. One bracket is used for all applications – level, stair, and angled – simply cut the bracket at the angle for the desired installation.

## 3 Specially Designed Cable Fittings

Stainless steel cable fittings come in both level and stair options packed for 36" finished rail height or 42" finished rail height. Our stair fittings swivel upward or downward for your stair angle, allowing you to insert the fitting straight, and angle in the direction needed for your stairs without worrying about installing the fitting at an angle.
